COMPUTER SCIENCE DEPARTMENT

Outlines

- Introduction
- •AIM OF THE STUDY
- •Subjects and Methods
- RESULTS
- Discussion
- Conclusion and Recommendations

- Exams period is an important period for both students and teachers.
- Usually it is a difficult time, as it is full of stress and anxiety.
- Many problems may occur while a student is attending for the exam.
- There is a need for technology to facilitate these procedures.

Aim Of The Study

The purpose of our research is to:

- Determine the problems during the exam period.
- Define a solution for the problems.
- Design a digital card that contains needed information and is used to check attendance.
- Facilitate and organize the exam entry process for students and teachers.
- Replace the use of papers for when checking exam attendance.
- Prevent problems from occurring.

Subjects and Methods

WHY?

Because the functional requirements are well determined, fixed and clear, also the techniques are clear, and the project has a short life cycle

Discussion

Strength Points

- 1. Combines student ID, exam info and checking attendance in one technique.
- Alternative for traditional mechanisms.
- 3. Solves essential issues in the university.
- 4. Protecting society's health by replacing the use of papers with non-touching technology which is QR code scanning.

Alternative Solutions:

- 1. Issue the card in the university website.
- 2. QR code is issued on the student card and the scanning is done by the teacher.

Conclusion and Recommendation

We find that the proposed system (Exam Digital Entry Card) solves many problems for students and teachers when attending for exams.

Recommendations:

- 1. The automatic silent mode for student's mobile during exam.
- 2. Adding the feature of exam supervisor in the teacher page.
- 3. Informative feedback about scanning errors.
- 4. Applying the system for the whole university.
- 5. Applying the system for all universities in the kingdom.
